

HOW MALAYSIANS MOVE

A visual story of public transport across services, routes and time

Public transport connects people to work, school and city centres. Usage differs by service, route and hour.

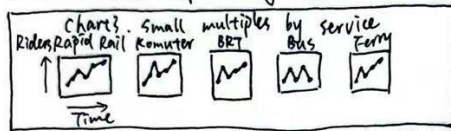

1. Why this matters

Public transport is part of everyday life. Let's start with the big picture.

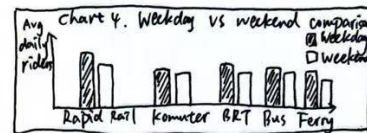

2. National Patterns

Patterns look different by service and by week.

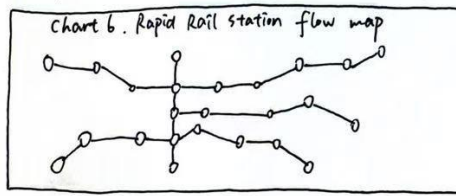

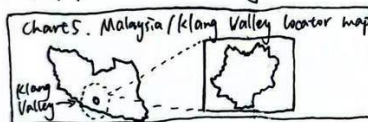

Most services show an upward trend, with different patterns.

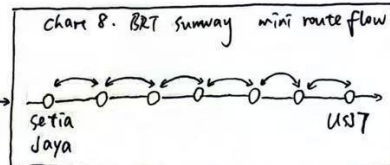

3. Where movements happens

Geography shows the story.

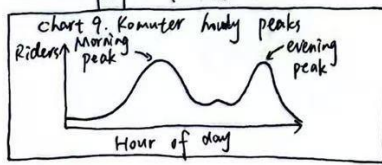

4. Inside the network

Flows reveal how the network is really used.

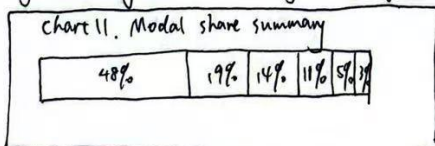

5. Daily commuting rhythm

When do people travel, and where do they start?

6. What this tells us

Key takeaways and the story in one glance.

- ### 3 KEY TAKEAWAYS
1. Rapid Rail carries the largest share of daily riders
 2. Weekday demand is stronger than weekend demand.
 3. Flows concentrate around major interchanges and commuting peaks.
